

eLearning matters

Many organizations struggle to deliver effective, timely and focused training to their employees at a reasonable cost. In addition, management is confronted with the need to provide personalized and updated learning programs to ensure compliance and up-to-date product knowledge.

Training professionals often feel they invest hundreds of hours in repetitive training activities and travelling to cover a distributed workforce, meanwhile line managers require training to be delivered just in time and induction and training cycles to be shortened, so ready-to-perform employees can be quickly available.

Product managers and subject matter experts (SMEs) in the organization spend too much time on training out of the office and too little on doing their job.

Existing eLearning solutions commonly require great effort to effectively manage the online training activities for employees, as using their fancy “can-do-it-all” virtual classrooms turn out to be needlessly complicated.

If even part of the above sounds familiar to you, then you probably need a Learning Management System (LMS) to help you overcome the strains, and focus on the milestones of your learning process.

If your company is one of the few to yet implement eLearning as a core training process or struggles each time when using the eLearning solution already in place, then **Melon Learning Suite**

is just for you.

Melon Learning Suite is a bundle of Melon LMS and Melon Author, which will help you deliver timely and efficient eLearning to your employees and track all the data you need to show how effective online training activities are in your organization.

simple intuitive

straightforward

We are all about simplicity. About making everything as easy and intuitive as possible, yet powerful enough in delivering everything you need for effective management of all online training activities. We go straight to the point and focus on the core training workflow, offering maximum flexibility and customizability.

custom content

If you need more interactive content, combining effective instructional strategies, modular learning architecture and great visual representation, then our instructional design team will transform your paper-based learning materials, utilizing the full potential of text, images, sound, video, animation and interactivity to build well-structured learning content that is captivating, easy-to-understand and fun.

Anytime, anywhere, for anyone

Melon LMS is a light-weight online learning management system that facilitates the corporate training process by **storing and organizing the learning content, delivering trainings and assessments, tracking and reporting learner's progress.**

Flexible and scalable, it manages both on-demand, self-paced learning and scheduled, time-limited tests, providing fine-granularity reports, email notification workflow and participant certification.

Melon LMS may run within your company intranet or can be hosted on Melon dedicated servers and accessible through Internet.

Popular interface, rapid development, one click upload

Melon Author is a **rapid learning content development tool**, based on Microsoft PowerPoint®. Inheriting its wide popularity among business trainers and the availability of training materials, Melon Author adds on the full power of Microsoft PowerPoint to provide the shortest possible learning curve and a streamlined integration with Melon LMS.

Fast deployment, rapid adoption, learner-friendly

A jump-start for any corporate training needs, Melon Learning Suite will normally be deployed and configured within 2 to 4 weeks time. Interface will be designed around the user, requiring little or no training to get started, resulting in high adoption rate and program success. Branded in your company's colors and style, Melon Learning Suite adapts easily to any type of organization, creating a tailored, familiar look and feel.

Compliant

All Melon Learning products are developed in compliance with the industry SCORM standard. They are also great standalone tools, easily integrated into third party solutions.

Affordable

Melon Learning Suite is delivered through a licensing program, based on the number of users. Price goes down from 20 Euro per user yearly.
